Company: Nimbus Cloud Technologies Pvt. Ltd. **Job Title:** Graduate Engineer Trainee – Software Development **Experience Required:** 0 years (Freshers) **Location:** Bangalore, Karnataka (Work from Office) **Employment Type:** Full-time, Permanent (6-month training + confirmation)

About the Role

We are hiring Graduate Engineer Trainees to join our core engineering team. Selected candidates will undergo a structured 6-month training program covering our tech stack before being deployed to live projects.

Key Responsibilities

- Assist in design, development, and testing of web applications under senior developer guidance
- Write clean, maintainable code following company coding standards
- Participate in daily stand-ups and sprint planning as part of an Agile team
- Debug and resolve basic defects reported during QA cycles
- Document code and prepare technical notes for assigned modules
- Learn and adapt to new frameworks/tools as assigned by the mentor

Required Skills

- Strong fundamentals in at least one programming language: Java, Python, or JavaScript
- Basic understanding of Data Structures and Algorithms
- Familiarity with SQL and relational databases (MySQL/PostgreSQL)
- Understanding of HTML, CSS, and basic front-end concepts
- Awareness of version control systems (Git)

Educational Qualification

- B.E./B.Tech in Computer Science, IT, or related branch (2025/2026 passing batch)
- Minimum 60% aggregate throughout academics (10th, 12th, and Degree)
- No standing arrears/backlogs at the time of joining

Selection Process

1. Online Aptitude Test (Quantitative, Logical Reasoning, Verbal)
2. Technical MCQ Round
3. Coding Test (2 problems, 60 minutes)
4. Technical Interview
5. HR Interview

Compensation

CTC: INR 4.2 LPA (during training: INR 18,000/month stipend)

Other Details

- Bond: 1 year service agreement post confirmation
- Relocation assistance not provided
