Job Description

Company: Zenith Cloud Systems **Position:** Senior Software Engineer — Backend (Java/Microservices) **Experience:** 5 - 7 Years **Location:** Bangalore, Karnataka **Work Mode:** Hybrid (2 days WFO)

Role Overview

Zenith Cloud Systems is seeking a Senior Software Engineer to lead design and development of high-throughput backend services for our core payments platform, processing millions of transactions daily.

Key Responsibilities

- Architect and implement scalable microservices using Java/Spring Boot
- Lead technical design discussions and produce high/low-level design documents
- Own performance tuning and troubleshooting of production systems (latency, throughput)
- Drive adoption of engineering best practices: code quality, test coverage, observability
- Mentor mid-level and junior engineers; conduct in-depth code reviews
- Collaborate with Product and Architecture teams on system design for new initiatives
- Lead incident response and root-cause analysis for critical production issues
- Contribute to capacity planning and infrastructure cost optimization

Required Skills

- 5+ years of experience in backend development with Java and Spring Boot/Spring Cloud
- Strong experience designing and scaling microservices architectures
- Deep understanding of RDBMS (PostgreSQL/MySQL) and query optimization
- Hands-on experience with distributed messaging systems (Kafka/RabbitMQ)
- Experience with containerization and orchestration (Docker, Kubernetes)
- Solid understanding of system design principles (caching, load balancing, sharding)
- Experience with cloud platforms, preferably AWS (EC2, RDS, SQS, Lambda)
- Strong grasp of CI/CD pipelines and DevOps practices

Preferred

- Experience in payments, fintech, or high-transaction-volume domains
- Exposure to observability tools (Prometheus, Grafana, ELK stack)
- Prior experience leading a small team (2-4 engineers)

Education

- BE/BTech/ME/MTech in Computer Science or related discipline

Interview Rounds

1. Technical Screening (HR)
2. System Design Round
3. Coding + Architecture Deep-Dive
4. Hiring Manager Round
5. HR/Offer Discussion

Compensation

INR 22 - 30 LPA (based on experience and current CTC)
