Objective:

Frontend Developer with hands-on experience in building robust web applications using Vite React, JavaScript, HTML5 and Tailwind CSS and modern frontend frameworks.

Skills:

Core Technologies:	Java, C
Web Technologies:	Vite React, JavaScript, Tailwind CSS, HTML5
Tech & Tools:	VS Code, Git, GitHub, Figma, MockAPI
Cloud & Deployment:	Vercel, Digital Ocean
Database:	MySQL

Education:

- M.Sc. in Scientific Computing | SGPA: 6.32 — Jul 2024 – May 2026
  Dept of Scientific Computing, SPPU,Pune
- B.Sc. in Computer Science | CGPA: 8.13 — Jun 2021 – May 2024
  New Art's, Commerce and Science College, Ahilyanagar
- HSC | 74% | Jawahar Junior College Chanda, Ahilyanagar
- SSC | 71% | Jawahar Madhyamik Vidyalaya Chanda, Ahilyanagar

Projects:

HomeChef Hub | Github-repo — July 2024 – May 2025

Team Size - 4 | Vite React, NodeJS, MySQL

HomeChef Hub is a web platform where user can add, search and find recipes based on their available ingredients. It makes cooking easy and reduce food waste.

Roles & Responsibilities:

1. Built 10+ frontend pages for the user interface using React.
2. Created an Advertisement Sections with clickable product links for direct user purchases.
3. Implemented Like, Dislike and Share features to enhance user interaction.
4. Created and integrated MockAPI to fetch and display dynamic recipe and advertisement data.

Numerical Library | Github-repo — Jan 2025 - May 2025

Team Size - 1 | C++

1. Designed a C++ numerical library for matrix operations.
2. Implemented iterative methods for solving system of linear equations.
3. Implemented root-finding algorithms such as Bisection, Newton-Raphson method.

Student Clearance System — Jan 2024 - May 2024

Team Size - 2 | HTML, CSS, JavaScript

Created a front-end clone of a student clearance system using HTML, CSS and JavaScript to explore how the system works and to practice web development skills.
