Education

M.Sc. Scientific Computing — *July 2024 – Present*
Department of SCMS, SPPU, Pune — GPA: 8.68

B.Sc. Computer Science — *Sep 2021 – June 2024*
Dr. D. Y. Patil SCS College, Akurdi, Pune — CGPA: 9.42

HSC (Science) — *June 2019 – March 2021*
Dr. D. Y. Patil Jr. College, Shahunagar, Pune — Percentage: 83.67%

Projects

Clarifi — A Personal Finance Mobile App — *Jan 2024 – April 2024*
Team Size: 1
Tech Stack: FastAPI, React Native, Tabula, SQLite
A mobile app that analyzes bank statements and visualizes spending habits.

- Built parsers for HDFC, SBI, ICICI to normalize bank statement data.
- Cleaned and standardized extracted data using pandas, then stored outputs as CSVs.
- Visualized spending trends with Pie, Bar, and Line charts using react-native-chart-kit.

Repo: `github.com/sfirdous/Clarifi`

Numerical Computing Library — *Jan 2025 – April 2025*
Team Size: 1
Tech Stack: C++, Makefile
Designed and implemented libraries for Numerical Computing from scratch in C++ as part of an academic course.

- Developed C++ classes for complex numbers, root finding, interpolation, and matrix operations.
- Validated matrix algorithms on a 255×255 matrix to test performance and correctness of the implemented algorithms.
- Automated builds using Makefile.

Repo: `github.com/sfirdous/NumericalComputing`

FPV — Forged Parts Verification System — *Sep 2024 – Dec 2024*
Team Size: 3
Tech Stack: Python, OpenCV, ArUco
A vision-based system to estimate dimensions of forged parts using image processing techniques.

- Implemented ArUco marker-based detection to measure real-world dimensions from images.
- Evaluated 9 techniques including camera calibration, photogrammetry, and edge detection.
- Analyzed feasibility of each method for industrial use.

Repo: `github.com/sfirdous/FPV`

Skills

- **Languages:** C/C++, R, Python, SQL, Java
- **Web Technologies:** HTML, CSS, JavaScript
- **Frameworks:** React Native, FastAPI, Tailwind CSS
- **Tools:** Git, VS Code, RStudio, Jupyter Notebook, SSMS
