EDUCATION

M.Sc. Scientific Computing

Department of SCMS, SPPU
SGPA : 5[Sem 1]
July 2024-Present

B.Sc. Computer Science

PVP College, A.nagar
CGPA : 8.12
August 2021 - May 2024

HSC

RBNB College, A.nagar
Percentage : 84.17%
July 2019 - Feb 2021

SSC

SLNV School, A.nagar
Percentage: 77.80%
June 2018 - April 2019

TECH-SKILLS

- **Languages:** C, C++
- **Web Technologies:** React Native, JavaScript, HTML5, CSS3
- **Database:** MySQL
- **Tools:** Visual Studio Code, Android Studio, Git, GitHub, Firebase, Figma

SUMMARY

M.Sc. Computer Science student with a foundation in mobile app development and data structures & algorithms. Passionate about building user-friendly digital solutions and solving real-world problems efficiently .

PROJECTS

1. CrowdNest – Smart Queue System **Aug 2024-May 2025**

Tech-Stack : React Native, Firebase, GitHub, Node.js, Express.js, MongoDB
Team SIze - 3

- A mobile-first solution aimed at solving the problem of long queues for table reservations in restaurants. The project was initiated to improve customer satisfaction and help restaurants manage peak-hour crowds effectively.
- Built the mobile frontend using React Native with a mobile-first, user-focused design.
- Integrated Firebase for real-time seat occupancy, reservations, and crowd updates.
- Added smart notifications and an owner dashboard

2. Numerical Computing Library using C++ **Jan 2025-May 2025**

Tech-stack: C++
Team Size : 1

- Designed and implemented libraries for Numerical Analysis in C++ as part of an academic course.
- Implemented solutions for systems of linear equations like:
  Gauss Elimination, Gauss-Jacobi, Gauss-Seidel
  LU Decomposition (Doolittle, Crout's, Cholesky)
- Added methods for root finding and interpolation such as:
  Bisection, Newton-Raphson, Fixed-Point
  Lagrange Interpolation, Least Squares Curve Fitting
- Supported matrix operations on large sizes like 49×49 and 225×225.

3. Gold Jewellery Website **Aug 2023-May 2024**

Tech-Stack : HTML5, CSS3, JavaScript
Team SIze - 4

- A responsive web application to display gold jewellery collections with interactive design and user-friendly navigation.
- Designed and developed the complete frontend using HTML and CSS to create an attractive, responsive layout.
- Implemented interactive features like image sliders and dynamic content using JavaScript.
