SQL-Intern-task Repository

PROJECTS

CROWD NEST- Restaurant Crowd & Reservation Management App [AUG 2024- MAY 2025]
Tech Stack – React Native, Node.js, Express.js, MongoDB, Firebase
Team Size- 3

- Developed a mobile application that helps users view real-time crowd status in restaurants and book tables accordingly.
- This app enables restaurant owners to update seat occupancy, while customers can check availability, reserve tables, and receive estimated arrival time notifications based on location.
- Aimed to minimize wait times and improve the dining experience using smart scheduling and crowd analytics.
