Saily Kadam

MSc Scientific Computing (Pursuing)

Pune, Maharashtra +91 9130143269 kadamsaily761@gmail.com github.com/Saily-Kadam
linkedin.com/in/saily-kadam

Skills

Programming Languages: C, C++, Python (Pandas, NumPy, Matplotlib)
Tools: Git, Canva, LaTeX, VS Code
Operating Systems: Linux (Ubuntu), Windows

Education

MSc Scientific Computing — SCMS, SPPU 2025–2027 *Pursuing*

BSc Computer Science — SPPU 2022–2025 *CGPA: 8.6/10*

12th (CBSE) 2022 *73%*

10th (CBSE) 2020 *77%*

Projects

1. Solving Zero Minor Problem | *Team Size: 4* *Aug 2025 – Present*

Description: A research-based problem in Computational Cryptography focused on the Zero Minor Problem. The project involves designing efficient algorithms to identify zero minors in high-dimensional matrices.

- Studied determinant behavior when patterned matrices are scaled from prime 17 to 97.
- Analyzed constant differences and ratios between the determinants from prime 17 to 97.
- Identified 351 special numbers for prime 17 to 97 and analysed their role in patterned matrices.
- Computationally worked on generating different patterned matrices from a base patterned matrix.
- Performed manual calculations on 100+ matrices, including determinant evaluation and scalar operations.

Tech Stack: C++, NTL, OpenMPI, CUDA
Git Repository: github.com/Saily-Kadam/Zero-Minor-Problem

2. Numerical Computing Library | *Team Size: 1* *Jan 2026 – Present*

Description: Designed a C++ numerical computing library for performing linear algebra operations on high-dimensional matrices.

- Implemented matrix operations in C++ using operator overloading and object-oriented programming concepts.
- Built Gaussian Elimination algorithms with and without pivoting for solving systems of equations.
- Implemented LU Decomposition methods for efficient matrix factorization.

Tech Stack: C++
Git Repository: github.com/Saily-Kadam/Numerical-Computing

Extracurricular Activities

- Hosted a podcast with Prof. Shridhar Gadre featured on YouTube: youtube.com/watch?v=8jJxWj832FA
- Hosted Alumni meet with 100+ guests in August 2025.
- Secured 3rd position at University Level Elocution Competition in September 2023.
