Sanika Mahind

mahindsanika03@gmail.com | GitHub | LinkedIn | +91 93566 78405

Technical Skills

Languages	C++, C, JavaScript
Web Technologies	HTML5, CSS3, React.js
Database	MySQL
Version Control	Git, GitHub
Tools	VS Code, Figma, AI Tools
Operating System	Windows, Linux (Ubuntu)
Core Concepts	Data Structures & Algorithms, Object-Oriented Programming

Education

M.Sc. Scientific Computing (Modeling & Simulation), Savitribai Phule Pune University — Pursuing | 2025–2027

B.Sc. Computer Science, Shivaji University — CGPA: 8.73 / 10 | 2021–2024

Projects

FarmFeed *July 2025 – March 2026*

Description: FarmFeed is an agriculture-focused e-commerce web application that connects farmers directly with vendors, enabling seamless buying and selling of agricultural products online.

Responsibilities:

- Designed and developed 8–9 complete web pages using UI/UX principles for a consistent user experience.
- Created a project architecture diagram before development to map page flow and component structure.
- Implemented role-based access system distinguishing between farmer and vendor accounts, enabling tailored dashboards for each user type.
- Designed a responsive and accessible UI suitable for rural users with limited digital experience, requiring multiple rounds of layout refinement.

Tech Stack: HTML5, CSS3, JavaScript, React.js

Numerical Methods Library *January 2026*

Description: A modular C++ library for solving systems of linear equations and performing matrix operations using classical numerical algorithms for scientific computing.

Responsibilities:

- Implemented algorithms including Gaussian Elimination and LU Decomposition to solve linear systems.
- Applied OOP concepts — Encapsulation, Abstraction, Inheritance, and Polymorphism — in library design.
- Built a file-based I/O interface to load and save matrix data from external files.
- Handled edge cases such as singular matrices and floating-point precision errors using input validation.

Tech Stack: C++, OOP, File I/O

Achievements

- Organized and managed an Alumni Meet of 100+ alumni, coordinating logistics and event execution.
- Arranged a Podcast event, managing speaker coordination and audience engagement.
