Projects

FarmEasy : E-Commerce Platform for Farmers Aug 2025 – May 2026
Team Size: 2
Tech Stack: React.js, Node.js, Express.js, MySQL | Deployed: Vercel, Render, Railway

- FarmEasy is an e-commerce web-application built specifically for farmers. It directly connects farmers with the vendors who sell seeds, fertilizers, and farming equipment with no middleman involved. This means farmers get access to products they need at fair prices, without any extra agents or commission cuts in between. Making farm shopping simple, affordable, and transparent for every farmer.

Numerical Computing Library Jan 2026 – Dec 2026
Team Size: Individual Project
Tech Stack: C++, OOPs

- A growing C++ library for solving System of Linear Equations, implemented Gaussian Elimination and LU Decomposition with three different methods.
- The library is designed using core OOP concepts including classes, inheritance, polymorphism, operator overloading and virtual functions, along with file handling and exception handling.
- It handles large matrices up to 225×225.
